

1. Given a string, return the first vowel (a,e,i,o,u) that appears exactly once. If none exist, return -1.

Test Case 1

Input: "engineering"

Output: "i"

Test Case 2

Input: "aabbcc"

Output: -1

2. Given an array, check if it can become strictly increasing by performing at most one swap.

Test Case 1

Input: [1, 3, 2, 4]

Output: true

Test Case 2

Input: [4, 3, 2, 1]

Output: false

3. Given an array, find the length of the longest contiguous subarray where the maximum element appears at least twice.

Test Case 1

Input: [2, 1, 3, 3, 2, 3]

Output: 4

Test Case 2

Input: [5, 1, 2, 3, 4]

Output: 0

4. Given a string and integer k, reverse every alternating block of length k.

Test Case 1

Input: "abcdefgh", k=2

Output: "bacdfegh"

Test Case 2

Input: "abcdefgh", k=3

Output: "cbadefihg"

5. You are given file sizes in an array. You can only merge two adjacent files at a time. The cost of merging is the sum of sizes merged. Return the minimum total cost to merge all files into one.

Test Case 1

Input: [4, 3, 2, 6]

Output: 29

Test Case 2

Input: [1, 2, 3, 4]

Output: 19

Test Case 3

Input:

[10, 20]

Output:
30

Test Case 4

Input:
[5, 5, 5]
Output:
25
